EXPERIENCE

Freelancing, Las Vegas, NV - Full Stack Developer

DECEMBER 2025 - PRESENT

Work on small client projects and personal applications, delivering end-to-end web solutions from front-end UI/UX to back-end development. Handle performance optimization, SEO improvements, and light graphic design to ensure fast, visually polished, and search-friendly websites.

Build and maintain landing pages, e-commerce sites, and media or streaming platforms using WordPress and custom stacks, managing the full lifecycle from planning and development to deployment and optimization.

702 Pros, Las Vegas, NV — Senior Software Engineer

SEPTEMBER 2021 - DECEMBER 2025

Served as a senior engineer at a small agency, taking on multiple responsibilities across development, infrastructure, support, and project leadership.

• Frontend Development:

Built fully responsive, performance-optimized user interfaces, translating mockups into production-ready designs with a strong focus on UX, accessibility, page speed, and SEO.

• Backend Development:

Developed and maintained backend logic using PHP and JavaScript, working with MySQL databases, APIs, and custom WordPress functionality.

• Server Administration:

Managed Apache servers via WHM, handling website and email migrations, backups, DNS configuration, and ongoing maintenance.

• IT & Web Support:

Handled client support tickets, bug fixes, and site issues, communicating directly with clients to diagnose and resolve problems efficiently.

• Project Leadership:

Led small to medium-sized projects, coordinated releases, performed QA testing, and mentored junior developers.

EDUCATION

CSN, Las Vegas, NV — *Associates of Applied Science - Software Programming*

JUNE 2018 - MAY 2021

Learned the fundamentals to programming, writing code and problem solving to create application software, mainly pertaining to Web and Mobile Applications as well as working with databases.

PROJECTS

Flagg's Landscaping — *Landing Page*

Flagg's Landscaping is a modern business website designed to establish a strong online presence for a licensed landscaping company. The site highlights services, credentials, and trust-building elements while maintaining a clean, responsive layout optimized for local SEO.

Jenni's Creations — *Ecommerce*

Jenni's Creations is a custom small-business website designed to showcase handcrafted products with a clean, elegant layout. The site focuses on visual storytelling, clear product presentation, and a user-friendly browsing experience that highlights the brand's creativity and craftsmanship.

Other Projects — *From Previous Employment*

Led and contributed to the design, development, and launch of multiple client websites, covering UI/UX, backend functionality, optimization, and support.
